QRC for Pressure Testing/ Leakage Testing

Sealant Enterprises is noted for developing quality products which are labour and time saving, compact, user friendly and highly efficient. *We have developed Quick Release Couplings (QRCs) for pressure testing to suit different end connections such as flared pipes, ribbed tubes, banjos etc. With our special designed QRCs, connection and disconnection time is reduced to a minimal and testing efficiency is increased in many folds. We can manufacture QRC for any end connection (e.g. Banjo, plain pipes, flared pipes, various shapes of flanges, ID/OD threading tapers, fabricated profiles)*

We also manufacture Quick Release couplings in various sizes and types.

Limiter Valve Assembly (IMPORT SUBSTITUTE)

We manufacture Limiter Valve Assembly for ZF Steering Gears. We supply them this component fully tested (average 30000 nos per month). It's a metal to metal sealing valve, normally closed type. Our performance rating by ZF Steering is 100% most of the time and minimum rating is 99.8%. Performance rating is based on quality, delivery and ISO audit. It's a critical component and for last 23 years we are sole supplier. They have presented their Best supplier award to us.

Quick Change Tip Jaws: Efficient Alternative for CNC soft Jaws

- A Unique Patented Design (Patent No. 221769)
- Save about 90% Inventory cost in soft jaws
- Save up to Rs.30000/- per machine per year in setting time only
- Supplied with easy identification box
- Requires very less storage space
- Hardenable or EN8 toughened tips available.
- Hexagonal bar clamping is possible

We have received **G. S. Parkhe award** for this product from **Mahratta Chamber of commerce industries and agriculture.**
